

Curriculum and Imagination: Process Theory, Pedagogy and Action Research

Curriculum and Imagination describes an alternative process model for designing developing, implementing and evaluating curriculum, suggesting that curriculum may be designed by specifying an educational process which contains key principles of procedure. This comprehensive and authoritative book: offers a practical and theoretical plan for curriculum-making without objectives shows that a curriculum can be best planned and developed at school level by teachers adopting an action research role complements the spirit and reality of much of the teaching profession today, embracing the fact that there is a degree of intuition and critical judgement in the work of educators presents empirical evidence on teachers human values. Curriculum and Imagination provides a rational and logical alternative for all educators who plan curriculum but do not wish to be held captive by a mechanistic ends-means notion of educational planning. Anyone studying or teaching curriculum studies, or involved in education or educational planning, will find this important new book fascinating reading.
