

## Secondary Headship: The First Years

The major changes taking place in UK schools have resulted in a dramatic increase in the demands made upon headteachers and the need for a greater understanding of their function. This is the first detailed study of newly appointed secondary heads, drawing together data from large national surveys of new heads, as well as case studies of new heads and their staff. The book looks closely at the problems faced by new heads and examines in detail their support and training needs. This book should be of interest to /OREAD.
