

The Futures of School Reform

The Futures of School Reform represents the culminating work of a three-year discussion among national education leaders convened by the Harvard Graduate School of Education. Based on the recognition that current education reform efforts have reached their limits, the volume maps out a variety of bold visions that push the boundaries of our current thinking. Taken together, these visions identify the leverage points for generating dramatic change and highlight critical trade-offs among different courses of action. The goal of this book is not to present a menu of options. Rather, it is to surface contrasting assumptions, tensions, constraints, and opportunities, so that together we can better understand and act on the choices that lie before us.
